

A packaging concept you can fall in love with for any season.

FUSION-PAK™ is Tray-Pak's customized process that combines the dazzling graphics of board with the tray strength and design flexibility of thermoformed plastic. It adds new snap to the heart-shaped box, while eliminating the need for a traditional set-up box. Or you can really break the mold by starting with a timeless tray design. After

that, customizing your package to each new seasonal mix is as simple as changing the graphics on the cover board.

When you work with Tray-Pak, new ideas that can build brand recognition, boost sales and cut costs are all part of the package.
